

Smell your way around the world!

Cadbury World will be celebrating National Science and Engineering Week from **15th March till 19th March 2010**. Every year we produce extra exhibits to challenge students as they tour around Cadbury World. Here is a list of some of the things going on:

- Explore the science of making chocolate.
- Download our Question sheets which will challenge pupils as they tour Cadbury World (from www.cadburyworld.co.uk).
- Find out how we test our cocoa beans and why we use packaging.
- See what effects temperature has on chocolate.
- Learn the techniques for cooling chocolate in our demonstration area.
- Find out how we get the bubbles in a Crunchie bar!

Activities happening this week include:

- Test your senses (in reception area) with our aroma pots featuring our **'chewing gums from around the world'**.
- Guess the mystery inclusion in our chocolate (which is in Essence, next to the play area at the back of Cadbury World)
- Meet a chocolate expert (in demonstration area).

Most of all enjoy the event!

Kind regards

The Education Team
